

PPR-LFR-521

Product Description:

PPR-LFR-521 is a PE-based masterbatch that imparts a rich opaque red color to HDPE bottle caps. It features excellent heat stability and resistance, and is free from heavy metals, lead chromates, and diarylide pigments. Specifically developed to ensure no shrinkage or warping, it is ideal for use in bottle cap applications.

Product Data:

Appearance	Granule
Carrier	PE-Based Masterbatch
Light fastness	7-8
Colorant	>40% Colorant inside
Dosage Addition Rate	Depends on the color needed.
Melting Point	-
Polymer Dryer Temperature (when using this color)	Not Needed.
Masterbatch Drying Condition	Not Needed.
Packaging	1000 Kg in 25 PE valve bags on a one-way stretch wrapped pallet.
Storage	Can be stored for Minimum one year under appropriate storing conditions, that is in its original packs in closed, dry rooms , at room temperature and away from sunshine.
Food approval	Complies with current regulations of western European countries (For Raw Material) and for final product it has been certified by FABES institute.
